Profile

Master's student in Data Science & Analytics with hands-on experience in machine learning projects. Developed AI models for medical image classification, regression-based price prediction, and content-based recommendation systems using Python, TensorFlow, and scikit-learn. Also experienced in full-stack development, API integration.

Technical Skills

Languages — Python, JavaScript, TypeScript

AI/ML — TensorFlow, Keras, scikit-learn, pandas, NumPy, Linear Regression, KNN, Transfer Learning (VGG16)

Web — React.js, Next.js, Node.js, REST APIs

Databases — MongoDB, MySQL

Tools — Git, GitHub, Streamlit, Jupyter Notebook

Projects

Brain Tumor Detection Using Deep Learning

- Built a classification model using VGG16 with transfer learning to identify four classes in MRI images: glioma, meningioma, pituitary, and no tumor.
- Tools: Python, TensorFlow, Keras, NumPy, PIL, scikit-learn

House Price Prediction Using Linear Regression

- Developed a Linear Regression model for predicting house prices.
- Performed data preprocessing and feature engineering.
- Achieved strong performance metrics.
- Skills: Feature Engineering, Linear Regression, Data Analysis, Exploratory Data Analysis

Movie Recommendation System

- Built a KNN-based content recommendation system using scikit-learn.
- Deployed with Streamlit for user interaction.
- Used pandas for data handling.

Professional Experience

Front-End Developer, Integral Progress Technology Apr 2024 – Aug 2024 | Marrakech, Morocco

- Developed dynamic web pages for a Quality Management module using React.js, TypeScript, and Tailwind CSS.
- Integrated APIs to fetch and display dynamic data, Managing application state using Redux Toolkit.
- Collaborated with backend team on API communication and error handling.

Freelance Software Developer Jan 2023 – Sep 2023

- Integrated the OpenAI API to generate dynamic content from keywords.
- Developed web scraping and automation scripts to extract data and streamline client tasks.
- Deployed applications on cloud servers and configured production environments.
